Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continuation of Disposition of Claims: Claims subject to restriction and/or election requirement are 1,2,4-6,8,9,16,18,19,23-26,29,35-38,41-44,49,51-57,59-64 and 66.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1,2,4-6,8,9,16,18,19,23-26,44,47,49,51,52,53-57,59-64,and 66 drawn to an apparatus and method for controlling the flow of a gas mixture.

Group II, claim(s) 29,35-38,41-43, drawn to a medical device with gas circulating features.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the corresponding technical feature for group I. is drawn to an apparatus with an adjustment signal generator for controlling an adjustment signal for controlling a driver and further including a comparator for comparing a setpoint signal and a feedback signal. The corresponding technical feature for group II. is drawn to a medical device and a main circuit with a circulation pump to pump gas through the main circuit of the medical device. Accordingly, the inventive effort corresponding to the technical feature of Group I is not required for the inventive effort corresponding to the technical feature of Group II.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
